Additional Comments

D1 - Areas of Interest

- Great topics overall! I'm not so sure about topic 6 and how that would look but maybe we can flush it out more as we study clustering. Topic 7 looks very interesting when using twitter.
- Only comment I would make is regarding sentiment analysis. While sentiment analysis is an interesting topic, if you simply do sentiment analysis on product reviews the business value is not clear. A review always comes with a rating. However, doing sentiment analysis and then seeing WHY certain products get poor reviews is a promising idea

D2 - Data Wireframes

- Great wireframe, you should probably have the column you are trying to predict, customer lifetime value
- I like the flow proposed for your sprints. This may change as you learn about your techniques but the plan seems good!
